

The **Rheinische Friedrich-Wilhelms-Universität Bonn** is an international research university that offers a wide range of degree programs. Some 35,000 students and more than 6,000 employees study and work on the foundation of a 200-year tradition. Awarded the status of a University of Excellence, the University of Bonn is one of the leading universities in Germany and enjoys an excellent international reputation.

The administration of the Department of Geography is looking to fill the following position as soon as possible:

Postdoc / Research Associate, 80% full-time equivalent (FTE) (50% FTE on a permanent basis + 30% FTE time-limited to two years)

The Department of Geography has more than 200 employees in total. Its 13 professors are supported by the Department's administration. The position forms part of the administration and will primarily support activities in the field of geomatics.

Your duties (50% FTE permanent):

- Coordinating the projects and research activities of the Interdisciplinary Center of Remote Sensing of Land Surfaces, including handling and managing projects
- Managing research data for the Department of Geography in cooperation with the USL Research Data Service Center and advising academic work groups
- Teaching courses (four course units per week per semester) in quantitative methods training, particularly GIS, in German and English and supervising final theses

Your duties (30% FTE time-limited):

- A project involving searching relevant literature to identify gaps in the research into remote-sensing applications using multi-sensor data flows. The findings are to be published in a peer-reviewed journal.

Your profile:

- University degree in the field of geography/GIS/remote sensing and relevant doctorate in geography or related subjects,
- practical experience in preparing, coordinating and leading research projects (e.g. Horizon or German Research Foundation projects) and/or industry activities (e.g. European Space Agency tenders),
- experience in teaching students methodology that combines remote sensing, GIS and statistics,
- experience in research data management and a very good knowledge of state-of-the-art digital infrastructures,
- knowledge of and experience in project administration and management plus, ideally, some SAP experience,
- confident and service-oriented team player,
- motivated, flexible personality and good social skills,
- very good command of German and English.

We are looking for a dedicated and resilient candidate who is willing and able to take on wide-ranging administrative duties in the administration as well as research and teaching responsibilities in the Department.

We offer:

- A diverse and demanding job with one of the largest employers in the region,
- opportunities for continuing professional development and expanding your academic and scientific network,
- participation in the university-wide pension system (VBL),
- access to the extensive university sports program,

- an excellent transport infrastructure with the opportunity to obtain a discounted employee ticket for public transportation (VRS) or to use assigned, affordable parking,
- a salary based on the 13 TV-L scale.

The University of Bonn is committed to diversity and equal opportunity. It is certified as a family-friendly university and aims to increase the proportion of women employed in areas where women are under-represented and to promote their careers. To that end, it urges women with relevant qualifications to apply. Applications will be handled in accordance with the *Landesgleichstellungsgesetz* (State Equality Act). Applications from suitable candidates with a certified disability or equivalent status are particularly welcome.

If you are interested in this position, please send your **complete** application by **7th December 2022** with the **application code 33.22.331** and **only in single a PDF file** by e-mail to personal@giub.uni-bonn.de.
