

User regulations Equipment pool

The loan of equipment available in the equipment collection is reserved for students and staff of the Department of Geography. Equipment may only be borrowed and returned during the specified opening hours of the equipment collection. The loan period for students and staff is 14 days. However, the loan period may be extended in the context of projects and final theses.

Equipment is issued to students upon presentation of a valid student ID. Each loan transaction is documented using a loan form, a copy of which is provided to the users as a receipt. By signing this document, users agree to the following terms and conditions of use:

By borrowing the equipment, users confirm that it is in full working order and in proper condition. Any defects will be documented on the loan form. Upon return, the full functionality of the borrowed equipment will be checked. If the device is fully functional, users will receive a note on the loan form confirming its return. Returning borrowed equipment by post is not permitted.

In the event of loss, the user is liable for the full replacement value of the equipment. If damage occurs due to gross negligence, the user is liable for the full cost of repairs. Users are therefore strongly advised to take out liability insurance to cover any potential claims for property damage.
